Coalition Sector Representatives

These sectors actively participate at monthly Coalition meetings and activities that support the anti-drug movement. It will take significant work to change the culture of the community and will be accomplished through education, environmental assessments and policy reviews. There is not one sector that carries more weight than another and that is why it is important to have a well-balanced coalition. We are still looking for members of civic, healthcare, volunteer, media, judicial and youth of the community to join our efforts.

Alignment, Synergies
